

## View Temporary Internet Files

When you surf the Internet, your web browser keeps a temporary copy of each web page.

### Update TEMPORARY FILE Settings

- Select **Tools – Internet Options**

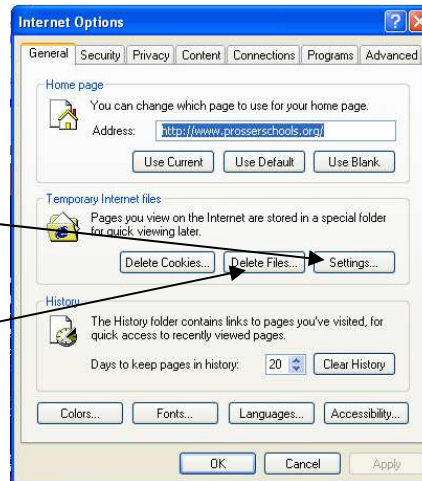

### Internet Options

This dialog box allows you to adjust the Temporary Files Settings

- Click on the **Settings** button

Delete Files

- This is also where a child may **delete** the Temporary Internet Files.

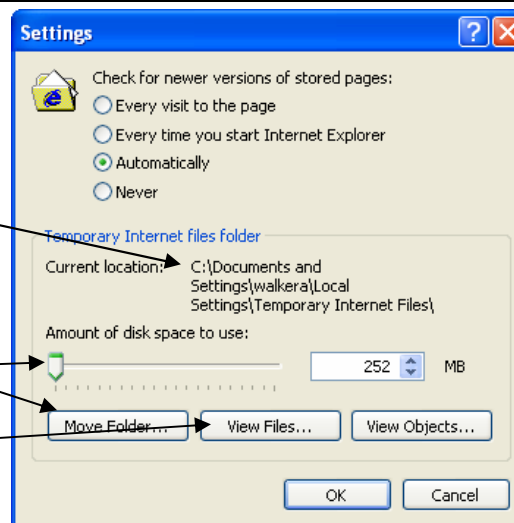

### Settings

This is the location of the Temporary Internet Files.

Change the location of the Temporary Internet Files

Increase the amount of disk space you want to use for web page storage.

Click **VIEW FILES** to see the saved pages.

Double click on the web page you want to view. (Web pages will be HTML Documents)
